## REFERENCE LIST

---

The staff of Data Processing Digest regularly monitors more than 180 computer, trade, and management periodicals for appropriate articles to digest each month. Every June issue and December Index Supplement includes all the publishers' addresses for your convenience. During other months of the year, only the periodicals

referenced in that issue are given. We ask you to please request copies of originals from the publisher of the periodical, rather than write to Data Processing Digest, as we do not copy or reprint, and your request would be delayed. Books should be ordered from their publishers or from a local technical book store.
